PERSONAL PROJECTS

My Portfolio
https://nattcodes.github.io/kome-nath-portfolio/
- Built a Portfolio website that showcases my Skills, personal projects and my CV or Resume using HTML, CSS, and JAVASCRIPT.
- Styled with modern CSS layouts using CSS Grid and FlexBox.

Change Am
https://nattcodes.github.io/changeam/
- Built a Currency Converter Web Application that calculates live currency and foreign exchange rates using HTML, CSS and REACT JS.
- Implemented the usage of the FETCH API to obtain the currency rate and flag API for each country.

Movie Quiz
https://nattcodes.github.io/moviequizapp/
- Developed a web application called Movie Quiz that poses ten arbitrary movie-related questions in forty-five seconds.
- Built using HTML, CSS and REACT JS.

EXPERIENCE

Mena Nath Media   (2022)

Web Developer
- Built a Public Relation Agency website using HTML, CSS and JAVASCRIPT.
- Designed the user interface using CSS styling methods and modern CSS layout such as FlexBox.

Transcript Application Portal   (2023)

Web Devloper
- Worked on a University Transcript Application Portal using HTML, CSS and REACT JS.
- Implemented the use of AXIOS to get the Faculty, Department, Course Area and Country's API.
- FlexBox and other contemporary CSS layout techniques were used in the design of the user interface.
- Controlled the REACT APIs' performance, resulting in higher-quality code.
